PROFESSIONAL SUMMARY

Full-Stack AI & Cloud Engineer with 1+ year of hands-on experience building scalable web applications and intelligent systems using JavaScript, React, Node.js, and modern cloud platforms. Proven expertise in developing RESTful APIs, deploying applications on cloud environments, and integrating AI-driven solutions including chatbot systems and automation workflows. Experienced in frontend-backend architecture, database design, and CI/CD-based deployment pipelines. Adept at leveraging cloud services, authentication mechanisms, and performance optimization techniques to deliver secure, high-quality applications with real-world impact. Strong collaborator with a focus on clean code, scalability, and continuous learning in AI and cloud ecosystems.

CERTIFICATES

PROFESSIONAL EXPERIENCE

Full-Stack, Cloud & AI Engineer (Founder) — VisualX Technologies 01/2026 – Present | Udumalpet,India

- Founded and led development of full-stack, cloud, and AI-driven applications. Delivered scalable and user-centric solutions for real-world business needs. Focused on performance, reliability, and modern architecture.
- Designed and deployed applications using React.js, Node.js, and cloud services. Ensured high availability and seamless integration across systems. Improved scalability and deployment efficiency.
- Built AI-powered systems including chatbot solutions and automation workflows. Enabled intelligent interactions and reduced manual processes. Enhanced system capabilities using AI-driven features.
- Implemented secure authentication, authorization, and data protection mechanisms. Ensured compliance with modern security standards. Protected user data across all application layers.
- Engineered CI/CD pipelines and optimized deployment workflows. Enabled faster releases with minimal downtime. Improved development lifecycle and operational efficiency.

Tech Stack: JavaScript, React.js, Node.js, Cloud Platforms, REST APIs, AI Tools, Git, Netlify

Full-Stack Developer Intern — Amdox 01/2026 – 03/2026 | Bangalore,India

- Developed and integrated full-stack features using modern JavaScript technologies. Enabled smooth interaction between frontend and backend components. Improved real-time data handling and system responsiveness.
- Built and consumed RESTful APIs for scalable application functionality. Supported dynamic data exchange across multiple modules. Enhanced application performance and backend efficiency.
- Assisted in database design and query optimization processes. Improved data retrieval speed and reduced execution time. Strengthened system stability and reliability.
- Participated in Agile development cycles including sprint planning and testing. Contributed to faster feature delivery and iterative improvements. Maintained high standards of code quality and collaboration.
- Implemented UI enhancements and resolved bugs across applications. Improved usability and user experience across platforms. Increased application stability and performance consistency.

Tech Stack: JavaScript, React.js, Node.js, SQL, REST APIs, Agile

Full-Stack Developer (Head Developer) — Scaplet 06/2025 – 12/2025 | Erode,India

- Led development of scalable full-stack web applications using React.js and Node.js. Delivered high-performance, responsive UI/UX across multiple modules. Ensured clean architecture and maintainable code for long-term scalability.
- Designed and implemented RESTful APIs for seamless frontend-backend communication. Enabled efficient data flow and reduced latency in application workflows. Improved system performance through optimized API handling.
- Architected reusable components and structured modular codebases. Accelerated development cycles and reduced redundancy across projects. Enhanced maintainability and team productivity.
- Collaborated with cross-functional teams to define requirements and system design. Participated in planning, development, and deployment phases. Ensured alignment with business and technical objectives.
- Optimized application performance using efficient state and data management. Improved load times and responsiveness across devices. Enhanced overall user experience and system reliability.

Tech Stack: JavaScript, React.js, Node.js, REST APIs, HTML, CSS, Git

PROJECTS

Antares – AI-Integrated Optimized Browser 2026

- Developed an AI-integrated web browser built on the Chromium engine. Enhanced browsing with intelligent search assistance and automation features. Delivered a modern and optimized browsing experience for power users.
 - Engineered the application using Electron.js and Node.js architecture. Ensured efficient resource management and cross-platform compatibility. Improved performance and responsiveness across multiple workflows.
 - Integrated AI capabilities for contextual suggestions and smart assistance. Enabled automated browsing tasks and intelligent user interactions. Increased productivity through AI-driven features.
 - Implemented privacy-focused mechanisms for secure browsing. Designed data protection strategies and minimized tracking risks. Ensured user confidentiality and safe data handling.
 - Designed a clean and developer-friendly UI/UX system. Focused on usability, accessibility, and performance optimization. Delivered a seamless and intuitive user experience.
- Tech Stack:** Chromium, Electron.js, Node.js, AI Integration, Privacy Engine

JARVIS – AI Personal Assistant System 2026

- Developed a local AI-powered personal assistant system with voice, chat, and automation capabilities. Enabled natural language interaction with wake-word detection and real-time responses. Delivered a seamless AI experience running directly on the user’s machine.
 - Engineered core modules including voice assistant, AI chat, task automation, and memory system. Integrated LLM-based conversational AI with context-aware multi-turn interactions. Enabled intelligent task execution using both voice and text commands.
 - Built a terminal-based interface for real-time command execution and system control. Allowed users to automate workflows such as opening apps, scheduling reminders, and file management. Improved productivity through natural language-driven system operations.
 - Implemented smart memory system to store user preferences and interaction history. Enabled personalized responses and adaptive behavior over time. Enhanced user experience through context retention and learning patterns.
 - Designed a real-time dashboard for system monitoring and performance tracking. Displayed CPU usage, AI response time, logs, and system activity insights. Ensured transparency, performance optimization, and system reliability.
- Tech Stack:** Python, Node.js, LLM (Gemini AI), Voice Recognition, TTS, Automation Scripts, Electron.js

Quantum Key-Based Secure Image Steganography with AES 2025

- Encryption**
- Developed a secure image steganography system with AES encryption. Combined quantum key concepts for enhanced data protection. Ensured confidentiality of hidden information within images.
 - Implemented multi-layer encryption techniques for secure communication. Embedded sensitive data without affecting image quality. Strengthened resistance against unauthorized access.
 - Designed secure key management and encryption workflows. Enabled safe transmission and decoding of hidden data. Improved overall system security and robustness.
 - Built encoding and decoding algorithms for steganographic processes. Ensured efficient data embedding and extraction mechanisms. Maintained high accuracy and performance.
 - Evaluated system performance based on security and efficiency metrics. Tested robustness against attacks and data loss scenarios. Validated reliability for real-world secure applications.
- Tech Stack:** Java / Python, AES Encryption, Steganography, Image Processing

SKILLS

- Frontend** — React.js, Vue.js, Electron.js, Redux, Chakra UI
- Backend & API** — Node.js, Express.js, REST APIs, GraphQL, NPM Ecosystem
- Cloud & MLOps** — GCP (Vertex AI, Cloud Run, Firestore), Azure (AKS, Container Apps, DevOps CI/CD), Terraform, Apache Airflow, Docker, Kubernetes
- Auth & Security** — AWS IAM, Secrets Manager, Azure Key Vault, OAuth, JWT, SHA256 Encryption
- Monitoring** — CloudWatch, Airflow Sensors, Jenkins, GitHub Actions
- AI & LLM Systems** — AI Integration, Multi-Agent Systems, RAG Pipelines, Intelligent Automation
- Databases** — PostgreSQL, MongoDB, Oracle
- Languages** — JavaScript, SQL, Java, Bash, Git
- Integrations** — SAP SOAP/OData APIs, Microsoft Graph API (SharePoint, Email), IBM Watson

EDUCATION

- B.E. Computer Science and Engineering,** 09/2022 – 05/2026 | Erode,India
Erode Sengunthar Engineering College
Pursuing undergraduate studies with a focus on software development, AI, and cloud technologies. Building practical experience through full-stack projects, AI applications, and scalable system design.
